| Degrees Earned | Major Equivalent - Has Graduated | Values appear beginning ithe year after the degree is earned, and are repeated for each year therafter to represent the student "has graduated" -- the same as CO Number Graduated.☐<br>This value represents the fractional equivalent of the student's term degree record.  If the student has a single degree (eg. BA) with a single major, the value will equal 1; if they have a double degree (eg. BA & BS), the value will be 0.5 for each; and if a triple degree, the value will be 0.333 for each degree.  Majors within the student's entire degree record are then sub-divided as a further breakdown of the fraction of a student's degree value(s).  If you want to count the number of majors (headcount) associated with a student's degree(s) and you want a double or triple degree-major to cause the student to be counted fully in each degree-major department, then use the CD Major Headcount object. |
| Degrees Earned | Major Headcount - Has Graduated | Values appear beginning ithe year after the degree is earned, and are repeated for each year therafter to represent the student "has graduated" -- the same as CO Number Graduated.☐<br>☐<br>This value is always 1 for each major in a student's degree and represents a count of each major in which an individual has earned a degree.  Students would be counted once for a single major, twice for a double major, and three times for a triple major. Combined majors count as a single major but are still divided among the combined program departments.  Students with more than one degree type will have each degree's majors counted as 1, resulting in a total larger than the number of degrees issued, or the number of students being awarded degrees.  Use the CD Major Equivalent object if you want to count only that fraction of a student's major(s) associated with each department. |
